## Welcome to the May 2005 S2Blue Newsletter

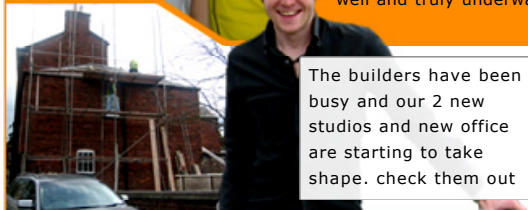

Welcome to the May 2005 S2blue newsletter – like the new funkier look? Well with all the new packages (and the summer coming) we thought we could do with a cooler look!

It's been a mad time over the last couple of months – we've been working on loads of new imaging packages for stations up and down the UK and abroad, creating tons of new demos and all this whilst having 2 new studios and a new office being built.

**Vocal session videos and pics**  
We've added videos and pictures of some recent vocal sessions check them out by clicking here

**Expansion**  
Well our expansion is well and truly underway

The builders have been busy and our 2 new studios and new office are starting to take shape. check them out

### What do look for in a Com Prod supplier?

Reliability? Experience? Creativity and imagination? An understanding of how radio advertising works? If that's what you need for your station you need S2blue!

We've been producing creative commercials for loads of stations in the UK and abroad recently so we thought it was about time we put together a new show reel and it's now available on-line - click here to listen. Alternatively if you'd prefer us to send you a CD copy or if you want more information on our affordable Com Prod solutions please e-mail us.

## New Demo's

We've put together a new batch of imaging demos together, all of which are now available on-line! Check out the details below:

**BBC RADIO CORNWALL** The BBC Radio Cornwall and BBC Radio Guernsey imaging package was produced for both stations, fusing BBC local branding with contemporary programming and vocals. Listen to the demo on-line now by clicking here

**YARR RADIO** The Yaar Radio imaging package created for London 's new urban Asian station – in ya face cuts and cutting edge solo vocals for imaging with attitude. Check out the demo now by pointing and clicking here.

**big john @ Breakfast** Over the past few years we've produced some cutting edge idents for Hallam FM's Big John @ Breakfast so we thought we'd put a demo together – so check out the new demo now, you know you want to ;)

**BBC RADIO LINCOLNSHIRE** Originally conceived in April 2003 the BBC Lincolnshire ID package demo is now available online. This more traditional package features Steve England tracks with JAM vocals.

### Recommended site of the month

We may have a new funky newsletter but we're keeping the popular web-site of the month (yay!).

This month we've got a cracker of a game – the TT Van game (which seems a bit of a strange name as nothing to do with Audi TT's or the Manx TT). Anyway it's another hard one but quite addictive – check it out!

Steve the voice over

Need an MVO for a commercial, sweeper or on-hold message? Try Steve – he's a great voice over (and can do characters) – used on loads of national & local TV and radio commercials. Have a listen to Steve – he's a very versatile experienced voice who gives 100%!!! Point and click to his VO web-site at:  
**[www.voiceovers.co.uk/steve.England/](http://www.voiceovers.co.uk/steve.England/)**

**MyS2blue.com**

Our revolutionary audio distribution client site has been up and running now for well over a year and we're currently having improvements made to make it more convenient and even easier to use – watch this space for more information.

If you want to discuss any project (or just want a chat) please give us a call & we'll try to help as much as we can!

\* Don't worry we're not going to be spamming your Inbox every week, only occasionally, but if you would prefer not to learn about all things S2blue then please reply to this mail saying so – we will be upset to see you go!!!
